

Newsletter

Issue 14 March 2025

Editorial

Dear Reader,

As we release this final edition of the ALTERNATIVE newsletter, we extend our heartfelt gratitude to everyone who has supported and contributed to the project. While this marks the end of our newsletter, the impact of ALTERNATIVE will continue through ongoing collaborations and future advancements in cardiotoxicity assessment.

This final edition of the ALTERNATIVE newsletter highlights the project's key activities and achievements in the first quarter of 2025. We showcase the progress made and the continued efforts to redefine cardiotoxicity assessment through the integration of innovative methodologies, the enhancement of chemical safety, and the promotion of non-animal testing approaches.

Our collaboration with the **Green Deal Projects Support Office** remains ongoing, providing a valuable platform to share our advancements and expand our impact within the broader scientific and regulatory community, we look forward to participate and join forces on peer-2-peer session with the Health WG on Non testing methods policy developments.

Thank you for being part of this journey—we look forward to seeing how our collective efforts shape the future of chemical safety and innovative testing methods. Stay connected, stay inspired, and keep pushing the boundaries of scientific progress!

Our updates will be available via our [website](#) and other channels on [LinkedIn](#), [Twitter](#) and [YouTube](#)

Kind regards,
The ALTERNATIVE Project Team

[ALTERNATIVE Project Hosts Successful Stakeholder Workshop](#)

On March 7, 2025, the ALTERNATIVE project successfully hosted a Stakeholder Session in a hybrid format, bringing together industry experts, researchers, and policymakers to discuss cutting-edge advancements in risk assessment for cardiotoxic chemicals. The session provided a platform for presenting key project developments

while exploring potential exploitation opportunities to ensure the project's findings translate into real-world applications. Key Highlights from ...
